

Our findings from e-safety surveys

To collect results for our e-survey we decided to fill in a questionnaire. As a class we completed our questionnaires. We collated our findings and decided to calculate and publish our results as we were surprised.

13% of y6 have been bullied online.

59% of y6 children go on the internet everyday.

77% of y6 children use special passwords.

32% of y6 children use at least 2 websites for research.

Girls tend to use social network more than games.

Boys tend to play games than go on social network.

77% of y6 children use a phone mostly for texting.

13% of y6 children play online games with strangers.

55% of y6 children use social media for talking to family.

77% of y6 children use YouTube.

82% of y6 have social media (you're supposed to be 13).

33% of parents don't have access to their child's social media account!

We were very interested to discover what we all put down in our surveys, and didn't know we were so open with our lives on social media.
